### Hazard Assessment & Classification

(Excerpt)

Hazard Assessment & Classification EWG aims to survey:

- Standardised mandatory threats,
- Maximum responses to vulnerability tests and,
- Hazard Division assignment procedures.

Current objectives are:

- Objective #1: Define a joint position on the harmonisation of international test procedures and acceptance criteria for Shaped Charge Jet Attack,
- Objective #2: Define a joint position on the harmonisation of Gap Test Criteria for Hazard Classification of Rocket Propellants,
- Objective #3: Monitor the evolutions of the regulatory framework in the field of ammunitions and energetic materials safety by developing and maintaining permanent relationship with National and International Authorities in order to propose possible IMEMG's positions in response to such evolutions.

Yves Guengant, chairman
